📍 Chandpur, Bangladesh

Career Objective :

A passionate Front-End Developer committed to crafting user-centric, scalable solutions. Eager to continuously improve technical skills and contribute effectively within collaborative tech teams.

Skills :

- ⇒ **Frontend** : React.js, JavaScript (ES6+), Tailwind CSS, DaisyUI, React Router, TanStack Query, Axios
- ⇒ **Backend** : Node.js, Express.js, MongoDB, REST APIs, JWT, Firebase Auth

Projects :

■ WorkSphere - Employee Management System :

[Live Site](#) | [GitHub](#)

Developed a full-stack employee management system streamlining HR, payroll, and daily task tracking. It provides customized dashboards and functionalities for various user roles.

Key Features :

- ⇒ Implemented secure, tailored dashboards and permissions for Admins, HR, and Employees.
- ⇒ Managed salary requests and processed secure payments via Stripe for HR/Admins.
- ⇒ Provided tools for employees to submit and track daily work, enhancing HR's productivity oversight.

■ Helpify – Service Sharing Platform :

[Live Site](#) | [GitHub](#)

Developed a modern service-sharing web application for seamless service management and booking with real-time updates.

Key Features :

- ⇒ Empowered service providers to effortlessly add, update, and delete their listed services.
- ⇒ Enabled users to easily explore services, view details, and book with a seamless experience.
- ⇒ Dedicated dashboards track personal, booked, and provided service statuses.

■ Work Window – Freelance Task Marketplace :

[Live Site](#) | [GitHub](#)

Developed a dynamic freelance task marketplace connecting individuals with freelancers for small tasks. The platform streamlines task posting, bidding, and fostering direct project connections.

Key Features :

- ⇒ Users can easily post new tasks with detailed descriptions, deadlines, and budgets.
- ⇒ Enables freelancers to bid on tasks and posters to track bids for seamless project initiation.
- ⇒ Users manage all posted tasks, with options to view, update, or delete them.
